**AMERICAN MADE.  
AMERICAN STRONG.**

**Largest Manufacturer of Steel Landscape Edging  
& Galvanized Nursery Sign Holders in the Industry**

**PRODUCT CATALOG**

Custom Metal Fabrication Since 1957®

**COLLIER METAL SPECIALTIES LTD**

# Our History

Collier Metal Specialties LTD

**Then** COL-MET began as Oak Click Metal in 1957 and primarily manufactured building products for Dallas-Ft. Worth-area contractors and businesses. On February 4, 1958 James Collier Sr. obtained a patent for galvanized clip edging beginning a new chapter for the company. In the early 1970s, at the request of local nurseries, Oak Click Metal began manufacturing galvanized sign holders. Oak Click Metal moved to Garland, Texas in the 1980s and transformed into Collier Metal Specialties. COL-MET then began producing stake type steel lawn edging at the request of their existing nursery and landscape customers to offer professionals an affordable, long lasting solution to retain mulch, rock, and stone in various landscape designs. The headquarters moved to their present location in Garland, Texas, in the late 1990s and now has expanded production capabilities and a 125,000-square-foot manufacturing facility.

**Now** COL-MET is the largest manufacturer of steel landscape edging and galvanized nursery sign holders in the industry. COL-MET offers steel lawn edging and accessories for retail and for landscape contractors, as well as a full line of galvanized steel sign holders for retail garden centers. COL-MET offers commercial tree rings and a complete line of edging accessories to help with installation and limitless design opportunities. COL-MET products are commonly specified by landscape architects around the country. COL-MET Steel Landscape edging products are available in a variety of heights, thicknesses and finishes.

COL-MET sign holders are made with prime galvanized steel for indoor or outdoor use. Durable galvanized steel and riveted construction will keep the sign holders usable and looking good for years. COL-MET also manufactures a variety of special purpose sign holders designed specifically for garden centers. From botanical plant markers to custom retail sign holders, COL-MET has the capability to produce a sign holder to exact specifications. They offer bedding plant signs, poster holders, table top sign holders, as well as face plates, vinyl cards and china markers. All sign holders can be powder coated in various colors for added customization.

COL-MET products can be found throughout the United States and Internationally.

**STEEL PRODUCTS. AMERICAN MADE. AMERICAN STRONG.**

Celebrating more than 50 years in the landscape and retail business, COL-MET has served its customers with the utmost care, ensuring that quality customer service isn't just a buzzword – it's a mission statement.

### Edging Calculator

To allow for 8" overlap:  
divide \_\_\_\_\_ feet needed by 9.33 to  
obtain \_\_\_\_\_ 10' pieces needed.

For example if you have 150' of  
installation length you will need to  
divide the 150' by 9.33 which equals  
16 - 10' pieces needed.

### Product Specification

Product # 1014 = 14 ga. x 10 ft in length  
Product # 1012 = 12 ga. x 10 ft in length  
Product # 1011 = 1/8" x 10 ft in length  
Product # 1007 = 3/16" x 10 ft in length  
Product # 1025 = 1/4" x 10 ft in length

Each piece includes 4 - 10 ga. stakes. Green, brown and black powder coat is standard. Unpainted or galvanized is also available.

### Steel Specification

Approximately 5/64" through 1/4" thick (see decimal equivalents) Hot Rolled low carbon steel ASTM-A-36, ASTM-A-283, and ASTM-A-569.

### Decimal Thickness Equivalent

Product # 1014 = .0817 to .0677  
Product # 1012 = .1126 to .0966  
Product # 1011 = .125 min  
Product # 1007 = .1875 min  
Product # 1025 = .25 min

Hot Rolled steel is soft enough to bend flat on itself in any direction without cracking and ductile enough for shallow drawing. Surface has normal mill oxide. The smooth deoxidized matte finish gives an excellent base for paint. Conforms to a minimum ASTM- A366-with carbon content held to .10 maximum. These materials meet or exceed ASTM and ASME specification. Material is hardness tested to maximum Rockwell of 70 and maximum Webster rating of 15, approximate Brinell hardness is 137. Tensile strength ksi is 58 to 80; yield strength ksi is 36 minimum.

### Paint Application

Electrostatically applied powder coating specially formulated to withstand extended outdoor exposure. This coating is ideally suited for lawn and garden equipment, fencing, playground and recreational equipment. Colors include green, brown, and black.

The information contained here is true and accurate to the best of our knowledge. This information is for the specified COL-MET products, and not for use with any other brand of edging. Specification on other products and coatings are available upon request. COL-MET is a registered trademark of Collier Metal Specialties® LTD Garland, Texas USA and cannot be reproduced without written permission.
